7 Future Outlook (20272034)

1. Generalpurpose Agentic Platforms - Modular "agent OS" enabling plugandplay tools, memory, and safety layers.
2. EdgeNative Agents - TinyLLMbased agents (500 M parameters) running on IoT devices with ondevice tool execution.
3. SelfRegulating Societies - Agents participating in decentralized governance (DAOs) with provable compliance.
4. Crossmodal Agency - Unified perception (vision+audio+sensor) feeding into a single planning core.
5. Regulatory Standardization - Global ISO/IEC standards for *agentic behavior certification* expected by 2030.
